

Software Developer (H/F)

Company

Get Your Way digitizes the logistical flows of **hospital pharmacies** based on hands-free solutions. The goal is to introduce digital technology in an intuitive and ergonomic manner for people on the ground.

Founded in 2019, the company designs and develops the *aRdent*® product line along with the associated software solutions. These innovations aim to make hospital logistics more reliable by reducing error rates, improving traceability, and increasing operational efficiency.

Mission

As part of our growth, we're looking for a **Software Developer** to join our team.

In this position, you will contribute to the **development of customer applications**, especially on software solutions developed by the company, including *Picking Pilot*, their home-made solution to drive hospital pharmacies logistics operations.

Your main tasks will include

- Improving and developing customers' application
- Contribute to product architecture design.
- Implement specific customer requests (connectors, dedicated functionality, etc.).
- Participate in the design of software tools to facilitate the management and deployment of our solutions.
- Propose functional and technical improvements to meet end-users' needs.

You will work in collaboration with a project manager, who will discuss the functional aspects of the solutions with you and act as an interface between you and the customers.

Technologies

- **Main languages:** Python, and C++
- **Frameworks:** Odoo, Flask in Python, and ESP-IDF in C++
- **Other technologies:** Docker, Git

What we offer

We offer a stimulating, fast-growing environment where you can play a key role in developing innovative solutions.

- **Flexibility:** Partial telecommuting (1 day/week) and flexible working hours for a good work/life balance.
- **Opportunities for growth:** As a start-up, we offer many possibilities for growth, depending on your involvement and desires.
- **Collaboration:** A dynamic team that values learning and knowledge sharing.
- **Impact:** The chance to contribute to pioneering products that redefine industry standards.
- **Learning:** A team culture that values continuous skill development and knowledge sharing, so that we can progress together and strengthen your expertise through each project.

Profile

We're looking for someone who's at ease in an agile, collaborative environment, capable of adapting to the varied challenges of a fast-growing start-up. Skills and qualities required include :

- **Education:** Master's degree in computer science or equivalent experience. Experience in Python and/or C++ value, with a strong interest in User Experience.
- **Skills:** Ability to work independently and in a structured way, with a critical eye for analyzing and responding to customer needs.
- **Qualities:** Team spirit, ability to receive and give constructive feedback. Passion for innovation, desire to learn about AI and data management, and commitment to sharing knowledge.
- **Attitude:** Versatility, curiosity and rigor to guarantee the development of high-quality ergonomic solutions.
- **Languages:** Good level of French (internal communication) and understanding of technical English.
